REG'LAR FELLERS—Ah! Spring! By Gene Byrnes

444 New Ideas Are Granted Patents

Sandwich Making Machine Is An Important One.

WASHINGTON. — A sandwich making machine, and a method of making a hard wax directly from sugar cane were among 444 patents granted recently by the United States patent office.

A fumigating method for treating insect infested grain stored in bins was patented by Fred W. Fletcher and Guene Kenaga of Midland, Mich., and assigned to the Dow Chemical company of Midland. A volatile fumigant composed of a solution of from 2 to 20 per cent of ethylene bromide in carbon tetrachloride is injected in the top of the bin and onto the surface of the stored grain.

Two tables of different heights are utilized in the sandwich making machine patented by Bengt A. Arvidson of Villa Park, Ill., and assigned the Miller Wrapping and Sealing Machine company of Chicago. A conveyor on the higher of the tables has pockets for bread slices, and as the bread moves along, every other slice is spread with the filling for the sandwich. Then the bread steps off to the lower table, the coated slice falling first. The plain piece of bread falls right on top, and there's the sandwich—butterless.

Production of sugar cane wax, patented by Werner F. Goepfert of Oradell, N. J., is accomplished by heat and chemical treatment of sugar cane muds.

A convertible attachment that makes a bicycle a four wheeler was patented by Clyde R. Kutil of Sioux City, Iowa, and is unassigned. The spares are attached to the rear wheel of the bicycle and are the same size as the other wheels.

Mammoth Telescope Will Make Map of Universe

PASADENA, CALIF. — A photographic map of the universe will be the first job, scientists disclosed recently, of the nearly completed 48-inch Schmidt telescope soon to be installed atop Palomar mountain.

The Schmidt scope, now being readied by California institute of technology experts, will be used as a companion instrument with a 200-inch telescope which also is to be installed on Palomar when completed.

The Schmidt, with its wider range, will discover objects for the farther-ranging giant instrument to investigate.

Dr. Edwin P. Hubble, astronomer recently returned to Caltech after serving as chief ballistician for army ordnance, said the job of mapping the whole sky would take the 200-inch telescope 1,000 years. The Schmidt, however, he said, could cover the universe photographically in five years.

Although termed a 48-inch telescope, the Schmidt has a 72-inch mirror. It takes its label from its 48-inch correcting lens, similar in function to the aperture in a camera.

The mirror has been finished. It weighs almost 3,000 pounds and is 9 inches thick. The correcting lens, a thin sheet of special plate glass, has not yet been completed.

This is garden time.

Rocks News

Rocks, March 25.- Farmers are busy sowing grass seed and plowing.

Mr. and Mrs. M. W. Eisenson, Lorene Eiseman, Mr. and Mrs. Allie Wright and son and Miss Dorothy Carter, of Lynchburg spent a Sunday recently with the former's daughter, Mrs. C .S. Ranson, of Pamplin.

THE OLD JUDGE SAYS...

GEORGE: "Yes, I certainly would like to hear why you call that an old fashioned idea, Judge."

OLD JUDGE: "Glad to tell you, George. Until recently, a person known as an alcoholic was generally treated as a social outcast. Little if anything was done to understand him or help him. But, during the past few years, medical research and study has developed that alcoholics are really sick people . . . that there is usually a deep-rooted physical, social or emotional reason behind their behavior. That's why today so much is being done to help them by finding out and correcting the condition that leads them to excess."

GEORGE: "How many folks are there like that, Judge?"

OLD JUDGE: "Well, according to scientific research, 95% of the people who drink drink sensibly. 5% do so unwisely, at times. Included in that 5% is the small percentage of the sick people I'm talking about."

GEORGE: "That certainly gives me a clearer picture. It's the most sensible approach I've ever heard on the subject."

NORFOLK AND WESTERN RAILWAY
ROANOKE 17, VIRGINIA
All decisions of judges will be final. The right is reserved to use or not use the names selected as winners. No acknowledgment or return of communications will be made.
Want to win some real extra cash? Here's how . . . Pick a winning name for our new Streamliner . . . a faster train between Norfolk and Cincinnati, which will make its maiden run in the near future.
Here are a few tips that may help you . . . Sharpen your pencil and get to work:
On a daylight schedule the westbound Streamliner, a luxury, reserved-seat coach train, will leave Norfolk at 7:30 A. M. and arrive in Cincinnati at 11:15 P. M. Eastbound, it will depart Cincinnati at 8:00 in the morning and glide into Norfolk at 11:45 that evening.
The equipment of the newly-designed train will include a powerful streamlined locomotive; luxurious air-conditioned coaches; an attractive, friendly tavern-lounge; and a beautifully appointed dining car, radiating the warmth of Southern hospitality. Interior color schemes will be harmonizing pastel shades of blue, emphasized by rich chrome trim. Adjustable, roomy seats; indirect flourescent lighting; quiet rubber tiled flooring; wide plate glass windows; large full-color photo-murals, and commodious smokers and washrooms are featured in all coaches.
The new Streamliner will speed between the City of Norfolk, its great shipping Port, famous seashore resorts and Cincinnati . . . over the majestic Blue Ridge and Alleghany Mountains; through broad valleys of scenic splendor; the vast coal fields of southern West Virginia; fertile farmlands and thence into the teeming industrial centers of Ohio.
Remember — there are 11 cash prizes. Make this a family contest — mail your entries promptly.
